

# LaSalle International Poised to Provide New Oil Storage Tanks in China

---

**Chatsworth, CA, March 1, 2015** - LaSalle International announced their on-going negotiations with China to design and build oil storage facilities with state-of-the-art cement-based tanks. The new non-corrosive tanks will allow the one-million-barrel oil storage facility to be compartmentalized for multi mix use within each tank, and a new square design will afford better and more economic land usage. LaSalle President Pierre Yenokian said the three-year project encompasses various sites throughout China.
